Wall DrinkFill aquaBUBBLER: NOT JUST DURABLE

Corrosion Resistant Stainless Steel

- Proprietary rust proof surface finish
- No 'tea' staining
- Marine-ready: stands up to coastal settings
- Withstands chlorinated environments

Flexible Design

- Both units can be installed at any height desired
- Horizontal separation of units left open (not imposed by design)
- Extensive colour range to choose from for each unit

HEAVY DUTY Body Material

- **Low Density Polyethylene (LDPE)** is extremely DURABLE and abrasion-resistant
- LDPE is immune to dinting, deformation and breakage
- High fatigue life and high impact strength
- Excellent mechanical & chemical stability
- Structural integrity over time – no powdering, crumbling or flaking
- **Uniform 4.0mm body wall thickness**

5 YEAR WARRANTY Guaranteed Tap Ware

- 100% lead free stainless steel
- Proprietary design based on universal design principles
- Ergonomic and low newton force operation (18 N to initiate, 15 N to maintain flow)
- UV stable **Mouth Guards** made from antimicrobial food grade thermoplastic

Splashback (recommended)

Drinking Component

Refill Component

Secure wall attachment

- Large verso surface area maximises bracket attachment to wall
- Super strong easy-install 304 SS wall bracket

TOUGH surface

- Extremely scratch and vandal resistant
- Stickers do not adhere to surface
- Graffiti proof: paint doesn't bond
- Scratch-resistant surface: difficult to mark with blades, stones etc.
- Burn resistant: flame retardant throughout material

CO_2 Low Carbon Footprint

- Manufacture of polymer body is severalfold LESS carbon intensive than equivalent steel body
- Recyclable steel parts and polymer body

PERMANENT pigments

- UV stable; colours do not fade
- Pigment is throughout material: impossible to scratch off
