

IMPORTANT

1. Unit must be installed by a **Certified Plumber** 
2. Installation must be in accordance with **AS/NZS 3500.1 & AS/NZS 3500.2**
max water pressure 1000 kPa, max temp 40°C

Nonadherence to any of the above, or failure to follow the steps detailed in this guide, will VOID ALL WARRANTIES

MOUNTING INSTRUCTIONS

Decide where to mount your Wall Drinking aquaBUBBLER.

All measurements will be taken from the Hanging Screw, which is top and centre of the internal bracket (key hole).

This Hanging Screw will be exactly 50mm below the desired height of the wall drinking dish.
i.e. a 700mm high unit from the ground will have a hanging screw of 650mm from the ground.

Fix a screw at this point for hanging the Wall Bracket, leaving 2mm gap to wall.

The centre of **Drain Outlet** is 80mm directly below the Hanging Screw, and to protrude 140mm from the wall surface.

Area available for **Water Supply** (1.2" BSP) is 70mm x 70mm, situated in the left lower position of the Hanging Screw.
